Summer Therapy Intensives

Located at EA Therapeutic Health

Spend the summer months improving results and avoiding regression from skills learned during the school year. With high dose individualized therapies (4-5 days/week for 2-3 weeks) children can see improved results from therapy interventions as compared to group or one time per week therapies. Summer is a great time to provide this opportunity for your child if they are receiving school-based therapies. Health insurance may cover this program.

Please call (507) 516-0632 to be
evaluated for the program.
